Company Profile

2026

Silk Road Mining & Services Co., Ltd.

China's Premier Strategic Partner for Securing and Developing Yemen's Mineral Resources.

About Us

A Bridge of Trust Across Continents

The establishment of Silk Road Mining Co., Ltd. is a concrete manifestation of the spirit of cooperation between Yemen and China. Since our inception in 2014, we have successfully built a unique mining model. Remaining resilient even during the most challenging times, including the global pandemic, fully demonstrates our reliability as an uninterrupted strategic supply partner.

We do not merely extract mineral assets; we view our operations as an active implementation of the 'Belt and Road' Initiative. We are committed to closely linking Yemen’s mineral wealth with China’s industrial revitalization. Relying on our affiliate, 'Sky Stone Company' located in Yiwu—the heart of China's hinterland—we possess robust localized support and operational assurance.

Vision & Mission

Deeply rooted in the philosophy of 'The Bridge of Trust,' Silk Road Mining is committed to providing high-quality primary raw materials for China's industries.
Vision: To become a pioneer in the development of Yemen's mineral resources, ensuring the strategic resource supply necessary for China's industrial growth and sustainable development.
Mission: To focus on establishing long-term partnerships based on mutual benefit, win-win outcomes, and deep collaboration

Core Values

Our operations and practices are built upon the following core value principles:
Win-Win Cooperation: We firmly believe that true success stems from mutually beneficial partnerships, ensuring our partners and local communities achieve shared prosperity and sustainable development.
Global Supply Chain Security: We are dedicated to providing stable and reliable raw material supply channels for our Chinese partners, ensuring the continuity of their industrial production.
Environmental Compliance: Throughout all stages of mining and extraction, we adopt industry-best environmental practices, committed to protecting the environment and minimizing ecological impact.
Sustainable Development: We strive to balance economic, social, and environmental needs, ensuring the long-term utilization of resources to benefit future generations.

General Manager's Message

A Visionary Insight for Win-Win DevelopmentA Visionary Insight for Win-Win Development

"At Silk Road Mining, our vision has long transcended the boundaries of traditional trade. We are fully committed to strengthening the supply chain security of China's industries and deeply integrating into the 'Belt and Road' Initiative. Guided by a decade of deep community roots and extensive field experience, we have built an outstanding reputation. Today, we officially open Yemen's doors to major strategic investment partners from China, particularly in core sectors such as strategic mineral resources. We firmly believe that only through mutual benefit, win-win cooperation, and mutual fulfillment can we co-create a brilliant future."

Jade (Jadeite) Project Success Case: A Decade of Excellence

The Jade project stands as a hallmark of our mining operational strength and serves as a model for China-Yemen bilateral cooperation:

Operational Sustainability: Since the project's inception, we have achieved uninterrupted, normalized monthly exports, driven by a highly stable and resilient operational framework.

Business Scale: We consistently supply 500 to 1,000 tons of premium raw Jade stones annually to the Chinese market, fully satisfying China's high-end industrial and commercial demands for premium jadeite.

On-Site Chinese Technical Expertise: The project site maintains a permanent deployment of 12 Chinese experts, including senior engineers, technicians, and logistics support personnel. The team resides on-site for up to 8 months each year, ensuring that the entire production and extraction cycle strictly complies with Chinese quality standards.

Strategic Alliances: To date, we have established deep investment partnerships with 2 leading Chinese enterprises and maintain long-term, stable trade workflows with more than 4 large-scale Jade importers.

Operational Capabilities & Licensing (Legal Compliance & Field Strength)

Silk Road Mining possesses a comprehensive operational and logistics framework designed to ensure the highly efficient management of our supply chain. We exercise full, end-to-end oversight across every single phase—from mineral exploration and extraction within Yemeni mining concessions to safe delivery at designated Chinese ports. Leveraging our extensive experience in mining and processing, we continuously optimize our logistics infrastructure to ensure the timely and high-standard delivery of raw materials.

Exploration & Mining: Since 2014, we have secured and held multiple valid mineral exploration and mining licenses across various northern and southern provinces of Yemen, maintaining highly efficient development operations consistently.

Safety & Environment: We have established solid community alliances with local tribes and regional authorities (across both the north and south). This network provides the highest level of security and safety guarantees for our mining concession sites as well as our stationed foreign experts.

Logistics Backbone: Our permanent affiliate office located in Yiwu, China (Sky Stone Company) serves as our primary commercial window. It is responsible for streamlining cross-border settlements, attracting strategic partners, and maintaining long-term, stable relations with Chinese counterparts.

Business Scale: Taking our Jade project as a benchmark model; since the commencement of self-managed operations, we have consistently exported approximately 500 to 1,000 tons of raw ore annually to China, currently maintaining a reliable track record of continuous monthly shipments.

Product Portfolio & Investment Opportunities

Our diversified product portfolio covers a wide range of minerals and raw materials, precisely tailored to meet the multifaceted demands of Chinese industry:

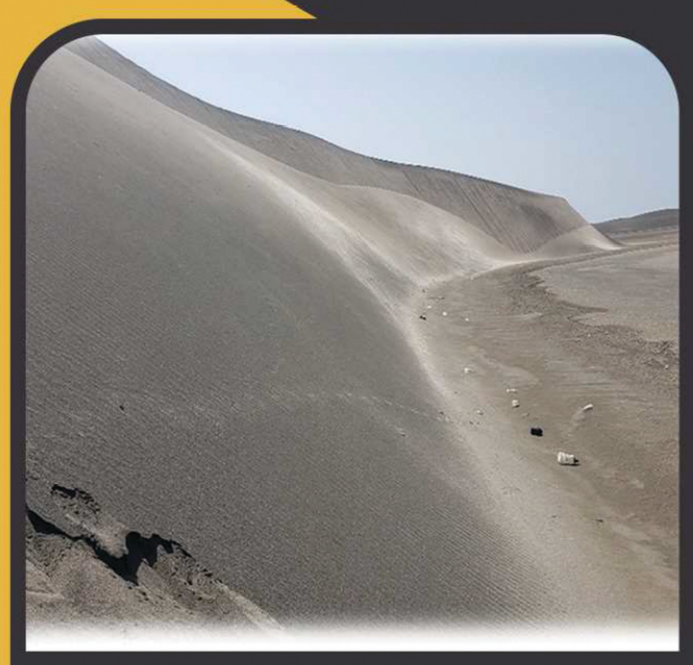

Jade (Jadeite): Supplying all grades of premium raw Jade stones, with a strategic focus on catering to the high-end segments of the Chinese market.

At the same time, we are actively committed to strategic expansion, providing core raw materials for high-tech industries:

Metallic Minerals: (Lithium, Gold, Copper, Iron, and Black Sand) — We have already reached preliminary cooperation agreements with 5 leading Chinese enterprises.

Industrial Minerals: (Quartz, Magnesite, Pyrophyllite, Feldspar, Zeolite, Graphite, and Gypsum)

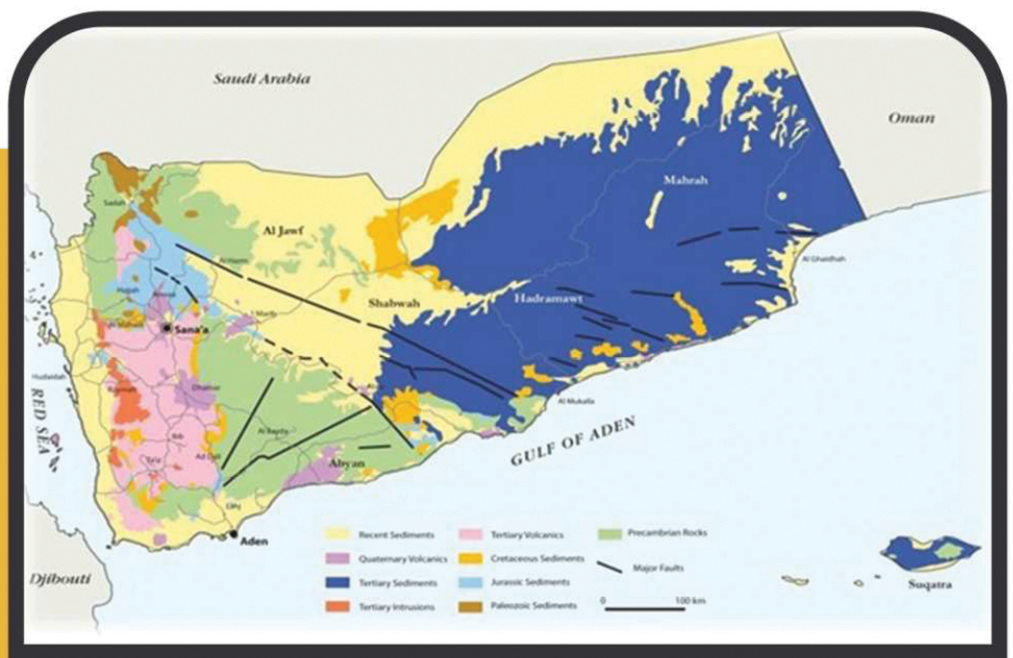

Communication channels with Chinese importers have been fully established, and we are preparing to launch the export workflows.

Environmental, Social, and Governance (ESG)

Silk Road Mining deeply recognizes that Environmental, Social, and Governance (ESG) standards are crucial for attracting top-tier investment partners and building a sustainable future. We are permanently committed to the following core areas:

Environmental Responsibility: Implementing sustainable mining practices to minimize our impact on the natural environment to the greatest extent possible.

Social Responsibility: Actively supporting the development of local communities surrounding our mining concession areas. Taking our Jade project as a model, we have directly generated 350 job opportunities, benefiting over 851 local families. By fostering community development, we have effectively enhanced social stability across our concession regions.

Corporate Governance: Adhering strictly to the principles of transparency, integrity, and ethical conduct throughout all business operations, backed by a robust and reliable institutional governance framework.

Strategic Partnerships

Silk Road Mining is proud of its robust strategic relationships and solid network of partnerships, which serve as the foundation of our success:

Chinese Partners: In the sector of Jade (Jadeite) investment, we have established deep cooperation with 2 leading Chinese enterprises and maintain active trade relations with more than 4 large-scale Jade importers. Furthermore, 5 Chinese enterprises have expressed strong interest in establishing strategic partnerships across metallic mineral sectors, including Lithium, Iron, Copper, Gold, and Black Sand.

Sky Stone Company: We own a wholly-owned affiliate in Yiwu City, China—Sky Stone Company. This entity specializes in importing mineral ores and metallic minerals from Yemen and is dedicated to seeking capable Chinese strategic investors for mining projects in Yemen.

Core Advantages & Strategic Support

Community & Government Relations: We have established deep-rooted community foundations and maintain solid alliances with local tribes. Simultaneously, our highly effective communication and coordination with regional government authorities across both the north and south of Yemen have tremendously simplified project operational workflows, securing all necessary regulatory policies and field safety support.

Trade Support from the Chinese Government: We have secured relevant trade and promotional support from Chinese governmental trade bodies. This not only facilitates precise matching between our company and large-scale industrial enterprises in China but also injects strong momentum into the entry of Chinese capital into Yemen's mining sector. Furthermore, this support provides immense convenience for cross-border financial settlements and banking transactions.

Operation in Extreme Environments: We possess rich operational experience and verified resilience in working successfully with Chinese enterprises under highly challenging and complex environments. Maintaining absolute business continuity and regular shipments throughout regional geopolitical fluctuations and the global COVID-19 pandemic fully demonstrates our exceptional risk-management and environmental adaptation capabilities.

Deep Integration into the "Belt and Road" Initiative: Our operational goals are highly aligned and integrated with the "Belt and Road" Initiative (BRI) framework. We are fully dedicated to strengthening economic and trade ties between China and Yemen through mineral resource collaboration, becoming pioneers in bilateral economic complementarity and shared development

Why Choose "Silk Road Mining"? Proven Field Experience

We possess extensive field experience in successfully collaborating with professional Chinese teams under extremely complex and challenging environments, ensuring highly efficient project advancement:

1-Legal & Regulatory Protection: Holding multiple long-term, valid mineral exploration and development licenses officially issued by the Yemeni government, ensuring complete legal compliance and investment safety.

2-Value-Added Technical Collaboration: We are actively seeking technical partners to introduce advanced manufacturing and processing technologies. This aims to upgrade our operations from exporting raw materials to producing high-value processed mineral products, completing the local industrial value chain.
